

TOWARDS SELF-UNDERSTANDING

Comprehensive Study Notes on Introspective Writing, SWOT Analysis, Johari Window, WHO Life Skills, Professional Ethics, Mindfulness, and Emotional Intelligence (EQ)

Made with ❤️ by [Sayeem Sadik](#) • leoristocrat.eu.cc

Curriculum Session 2026

SYLLABUS BLUEPRINT & INTERNAL MARKS DISTRIBUTION

Continuous Experiential Evaluation • Total 50 Marks

Unit 1

15 Marks

Reflective Writing Tasks

Introspection, Values, Stress, Spiritual Leaders

Unit 2

15 Marks

Workshops on Personal Growth

SWOT, Life Skills, Johari Window, Mindfulness

Unit 3

10 Marks

Seminars on Emotional Mastery

Humane Qualities, EQ, Soft Skills, Self-Esteem

SIP-I Link

10 Marks

Life Skills Field Practice

School Internship Transaction & Reporting

UNIT 1: REFLECTIVE WRITING TASKS FOR SELF-AWARENESS

Introspective Journals, Social Values, Stress Dynamics & Philosophical Heritage

EVALUATION: 5 × 3 = 15 MARKS

1.1 THE EPISTEMOLOGY OF REFLECTIVE WRITING: DEVELOPING THE "INNER WITNESS"

Reflective Practitioner Model

In teacher education, **self-reflection** is not passive daydreaming; it is a systematic, cognitive process of examining one's underlying beliefs, emotional triggers, subconscious prejudices, and classroom actions. As educational philosopher Donald Schön articulated, great teachers do not simply operate as mechanical syllabus transmitters; they are **reflective practitioners** who engage in continuous *reflection-on-action* and *reflection-in-action*.

Monthly Creative Writing

Documenting authentic classroom observations, tracking moments of self-doubt or breakthroughs with quiet children, and crystallizing lessons learned from day-to-day encounters.

Scripting Values in Action

Translating abstract virtues like honesty, moral courage, empathy, and mutual cooperation into dialogic role-play scripts for children to enact and emotionally internalize.

Introspective Event Audits

Analyzing a significant lived crisis or triumph to identify one's coping strategies, emotional blind spots, and the resilience mechanisms that emerged.

Teacher's Psychological Insight: "We do not learn from experience alone; we learn from *reflecting* on experience." An unexamined teaching practice repeats the same 1 year of teaching experience 30 times, whereas a reflective practice evolves into 30 years of compounding pedagogical wisdom!

1.2 "UNDERSTANDING ONESELF IS POWER": PSYCHOLOGICAL FOUNDATIONS

The timeless philosophical axiom—"Knowing others is intelligence; knowing yourself is true wisdom. Mastering others is strength; mastering yourself is true power" (Lao Tzu)—serves as the foundational bedrock of educator mental health. Psychologically, self-understanding is anchored in three interconnected constructs:

1. Self-Concept & Self-Image

The cognitive schema of who you believe you are—your strengths, limitations, core values, and behavioral tendencies. A realistic self-concept prevents both paralyzing self-deprecation and arrogant narcissism.

2. Teacher Self-Efficacy (Bandura)

Albert Bandura demonstrated that an educator's deep internal conviction in their ability to influence even the most disengaged, marginalized learners directly correlates with actual student scholastic achievement!

3. Internal Locus of Control

Rejecting victim mentality. Rather than blaming poor rural infrastructure or unsupportive parents for classroom deficits, self-aware educators ask: "What innovative pedagogical agency can I exercise right now?"

The Role of Appreciation in Self-Understanding: Genuine appreciation received from mentors, peers, and young students serves as social mirroring. However, a mature teacher must balance external validation with internal integrity, ensuring that self-worth does not fluctuate wildly with praise or criticism.

1.3 & 1.4 STRESS MANAGEMENT, PEACE & INSPIRATIONAL ROLE MODELS

Heritage & Resilience

DECONSTRUCTING TEACHER STRESS & BURNOUT

Teaching is an emotionally demanding, high-burnout profession. Chronic stress triggers the sympathetic nervous system (fight-or-flight), impairing the prefrontal cortex and leading to classroom irritability:

- **Cognitive Reframing (CBT):** Separating factual classroom events from catastrophic catastrophic thoughts (e.g., "A child is distracted" vs. "I am a total failure as a teacher").
- **Somatic Anchoring:** Taking 3 deliberate diaphragmatic breaths before responding to unruly classroom disruptions.
- **Compartmentalization:** Leaving institutional conflicts at the school gate to nurture private personal rejuvenation.

EXEMPLARS OF SELF-REALIZATION & EDUCATIONAL REFORM

- **Mahapurush Srimanta Sankardeva:** Pioneer of neo-Vaishnavite egalitarianism in Assam. Demonstrated profound self-realization by demolishing caste barriers through community Namghars, drama (Ankiya Naat), and literature.
- **Sri Sri Madhabdeva:** Master of surrender, self-mastery, and devotion (Bhakti), modeling complete ego-dissolution in service to societal upliftment and ethical literature (Naam Ghosha).
- **Swami Vivekananda:** Defined education as "the manifestation of the perfection already in man." Advocated character-building, moral courage, and fearlessness (*Abhiti*).
- **Paramahansa Yogananda:** Illustrated the scientific mastery of life forces through Kriya Yoga, showing that true inner peace is attained by quieting sensory turbulence.

Self-realization transforms the teacher from a taskmaster into an inspiring moral compass!

UNIT 2: EXPERIENTIAL WORKSHOPS ON PERSONAL GROWTH

SWOT Analysis, WHO Life Skills, Johari Window, Communication Barriers & Mindfulness

EVALUATION: 5 × 3 = 15 MARKS

2.1 PERSONAL & INSTITUTIONAL SWOT MATRIX

Strategic Self-Audit

Originally adapted from strategic organizational management, **SWOT Analysis** serves as an extraordinarily powerful reflective exercise for student-teachers. It balances internal diagnostic capabilities against external environmental realities:

S - STRENGTHS (অভ্যন্তরীণ সবলতা)

Internal & Present

Inherent positive assets, skills, knowledge, and psychological virtues you possess:

- High empathy, patience with young children, and vocal clarity.
- Mastery over regional dialects; artistic storytelling flair.
- Willingness to learn, punctuality, and technological literacy.

W - WEAKNESSES (অভ্যন্তরীণ দুর্বলতা)

Internal & Present

Internal liabilities, limiting habits, and developmental deficits requiring remediation:

- Fear of public speaking / stage anxiety during morning assembly.
- Impatience when children repeatedly make computational errors.
- Difficulty setting professional boundaries; procrastination in grading.

O - OPPORTUNITIES (বাহ্যিক সুযোগ)

External & Future

Environmental possibilities, professional networks, and institutional pathways:

- Leveraging DIKSHA, SWAYAM, and online teacher professional development.
- Learning indigenous folk arts and puppetry from local village artisans.
- Collaborating with senior mentor teachers during School Internship (SIP).

T - THREATS (বাহ্যিক প্রত্যাহ্বান)

External & Future

External obstacles, socio-economic challenges, and systemic pressures:

- Extreme socio-economic distress, seasonal floods, or student absenteeism.
- Lack of physical electricity or multimedia infrastructure in remote schools.
- Cynicism or passive resistance from disengaged colleagues in school staffrooms.

2.2 LIFE SKILLS EDUCATION: THE WHO 10-SKILL FRAMEWORK

WHO / UNICEF Architecture

The World Health Organization (WHO) defines **Life Skills** as the abilities for adaptive and positive behavior that enable individuals to deal effectively with the demands and challenges of everyday life. These 10 core skills operate in complementary pairs across three broad domains:

Mode of Transaction: Life skills cannot be lectured from a blackboard! They must be acquired experientially through structured drama, dilemma simulations, circle times, collaborative team building, and reflective journaling.

2.3 & 2.4 THE JOHARI WINDOW MODEL & BREAKING COMMUNICATION BARRIERS

Joseph Luft & Harry Ingham (1955)

THE FOUR QUADRANTS OF THE JOHARI WINDOW

1. Open / Arena

Known to Self & Known to Others
Shared public behaviors, values, transparent pedagogical practices.

2. Blind Spot

Unknown to Self, Known to Others
Unconscious ticks, tone sharpness, or favoritism seen only by peers.

3. Hidden / Façade

Known to Self, Unknown to Others
Private anxieties, imposter fears, personal domestic struggles.

4. Unknown

Unknown to Self & Unknown to Others
Latent potentials and subconscious repressions unlocked through crisis.

🎯 **The Goal of Teacher Training:** Expand the Open Arena by soliciting honest peer feedback (reducing the Blind Spot) and healthy vulnerability/disclosure (reducing the Façade).

OVERCOMING COMMUNICATION BARRIERS IN SCHOOL

- **Physical Barriers:** Poor classroom acoustic reverberation, loud street traffic, broken benches, extreme humidity.
- **Psychological Barriers:** Teacher authoritarian anger, student fear/anxiety, defensive ego resistance.
- **Semantic & Linguistic Barriers:** Using complex technical jargon or formal standard language that contradicts the child's home dialect.
- **Systemic / Cultural Barriers:** Rigid patriarchal status hierarchies discouraging young children from asking spontaneous questions.

The 7 Cs Solution: Clear • Concise • Concrete • Correct • Coherent • Complete • Courteous!

TEACHER PROFESSIONAL ETHICS & ACCOUNTABILITY

A professional code of ethics is the moral compass guiding educator decisions in the absence of external monitoring:

- **Duty Towards Students:** Zero discrimination (caste, religion, gender, ability); complete elimination of corporal punishment and mental sarcasm; safeguarding confidentiality.
- **Duty Towards Community:** Respecting village cultural heritage, mobilizing parents, maintaining transparent communication.
- **Duty Towards Profession:** Continuous lifelong self-upgradation, resisting commercial private tuitions, exhibiting punctuality and integrity.

Accountability is an internal moral commitment, not mere fear of bureaucratic inspection!

MINDFULNESS & MEDITATION: PRACTICAL SCIENCE OF STILLNESS

Mindfulness is maintaining moment-by-moment, non-judgmental awareness of bodily sensations, thoughts, and classroom environments:

- **Neurobiological Benefits:** Decreases cortisol, calms hyperactive amygdala reactivity, and strengthens executive function in the prefrontal cortex.
- **Classroom Practice (Anapanasati):** 2 minutes of quiet collective mindful breath-anchoring before commencing Class 1 lessons.
- **Mindful Responding vs. Reactive Shouting:** Cultivating the momentary space between emotional stimulus and conscious pedagogical response.

A tranquil, emotionally centered teacher creates an effortlessly calm classroom!

UNIT 3: REFLECTIVE SEMINARS ON HUMANE QUALITIES & EMOTIONAL MASTERY

Carl Rogers' Humanism, Goleman's EQ, Soft Skills Etiquette & Resilient Self-Esteem

EVALUATION: 5 × 2 = 10 MARKS

3.1 NURTURING HUMANE QUALITIES: CARL ROGERS' HUMANISTIC PEDAGOGY

Person-Centered Education

Psychologist Carl Rogers demonstrated that true cognitive learning cannot take place in a climate of psychological threat, ridicule, or conditional acceptance. To cultivate an environment of transformative human warmth, the educator must embody **Three Core Attitudinal Conditions**:

1. Unconditional Positive Regard (UPR)

Accepting and prizing every child for their inherent human worth, completely detached from their scholastic marks, tidy clothes, or socioeconomic pedigree. Love without prerequisites!

2. Empathetic Understanding

Sensing the student's private inner world as if it were your own, without ever losing the "as-if" quality. Perceiving why a child feels anxious during oral reading without judging them.

3. Congruence / Genuineness

Being real, authentic, and transparent. Dropping the artificial mask of the "infallible teacher". A congruent teacher honestly admits: "I do not know the answer to that question, let us research it together!"

3.2 MANAGING EMOTIONS: DANIEL GOLEMAN'S EMOTIONAL INTELLIGENCE (EQ)

EQ > IQ in Teaching

Research in educational neuro-psychology confirms that a high IQ (Intelligence Quotient) alone does not make an inspiring teacher; **EQ (Emotional Quotient)** is the primary predictor of classroom harmony, student trust, and pedagogical longevity. Goleman structures EQ into five sequential domains:

1

Self-Awareness

Recognizing an emotional mood as it surges in real time.

2

Self-Regulation

Managing disruptive impulses; delaying knee-jerk punitive reactions.

3

Internal Motivation

Pursuing educational goals with passion beyond external paychecks.

4

Empathy

Intuitively deciphering unvoiced emotional currents in students.

5

Social Skills

Skillful persuasion, collaborative leadership, and conflict mediation.

Classroom Application: When two Class 3 students get into a fistfight, an emotionally reactive teacher shouts and slaps both. An emotionally intelligent teacher separates them gently, lets their adrenaline stabilize, validates their anger ("I see you are furious"), and teaches verbal conflict de-escalation.

3.3 INCULCATING SOFT SKILLS & SOCIAL GRACE

Children learn social grace by observing the teacher's embodied conduct. Soft skills operate as emotional lubricants in school ecosystems:

- **Active Non-Verbal Modeling:** Maintaining respectful eye contact at child eye-level, polite posture, and cheerful morning greetings.
- **Social Etiquette:** Consistently modeling "Please", "Thank you", and "Excuse me" when requesting classroom favors from children.
- **Conflict De-escalation:** Teaching children to articulate disagreements with "I-statements" (e.g., "I feel sad when you snatch my crayon") rather than physical violence.

Children rarely do what we tell them to do; they do what they see us do!

3.4 NEGOTIATING SELF-CRITICISM VS. SELF-VALIDATION

Student-teachers frequently fall into two destructive psychological traps regarding self-esteem:

- **The Trap of Toxic Self-Criticism:** Relentless internal voice of condemnation, imposter syndrome, and magnifying small teaching slips into proof of worthlessness.
- **The Trap of Fragile Vanity:** Defensively refusing to accept constructive mentor critique or blaming students for unsuccessful lessons.
- **The Golden Synthesis (Self-Compassion – Kristin Neff):** Acknowledging flaws with warm kindness: "My reading activity did not go well today, but teaching is a complex art. I will adjust my scaffolding tomorrow."

Self-validation anchors healthy self-esteem independent of external praise!

★ PAPER S1.4 CONTINUOUS INTERNAL ASSESSMENT ARCHITECTURE (50 MARKS)

100% Practical & Portfolio Based

Unit 1: Reflective Writings

15 Marks (5 × 3)

Select Any 5 Writing Tasks

Unit 2: Workshop Reports

15 Marks (5 × 3)

SWOT • Any 2 Workshops

Unit 3: Seminar Presentations

10 Marks (5 × 2)

Paper & Deliberation on 2 Themes

SIP-I Life Skills Field Delivery

10 Marks

Assigned via School Internship

Prescribed Trainee Activity Requirements:

- **Reflective Journal Portfolio:** Each student must maintain an ongoing introspective journal documenting classroom observations, self-analysis, and emotional growth.
- **Interactive Workshops:** Actively engage in Johari Window disclosure, peer feedback exercises, and daily morning assembly meditation/mindfulness drills.
- **SIP-I School Transaction Link:** Conceptual understanding of Life Skills Education must be tested in real classrooms during the 2-week School Internship I. Trainees will organize life skills games and submit an analytical report countersigned by the school head.

Evaluation Philosophy:

Faculty mentors evaluate Paper S1.4 not on rote theoretical regurgitation, but on the depth of the student-teacher's critical self-honesty, emotional vulnerability, empathy, and constructive professional attitude. Total internal marks: 15 + 15 + 10 + 10 = 50 Marks.
