

Yoga Education

An exhaustive academic monograph investigating the historical, etymological, and philosophical foundations of Yoga, classical treatises (*Yoga Sutras*, *Bhagavad Gita*, *Hatha Yoga Pradipika*), debunking contemporary cultural myths, developmental and postural hygiene in primary education, Maharshi Patanjali's eight-limbed Raja Yoga (*Ashtanga*), Hatha Yoga energetic physiology (*Ha-Tha*, Nadis, and Kundalini), the four classical spiritual paths (Karma, Jnana, Bhakti, and Tantra Yoga), the complete 12-step biomechanical sequence of Surya Namaskar, postural classifications (standing, sitting, prone, supine), respiratory mechanics of Pranayama (Puraka, Kumbhaka, Rechaka), neuromuscular Mudras and Bandhas, the six purificatory Shatkriyas, Japa versus Ajapa meditation, functional modalities (Supplemental, Compensatory, Regenerative, Power), clinical interventions for psychosomatic and lifestyle disorders, human organ systems physiology, and the continuous 30-mark Practicum framework featuring school morning assembly protocols and internship field practice.

SYLLABUS ARCHITECTURE & MODULE WEIGHTAGE

Total: 20 External Marks

Unit 1

5 Marks

Foundations & History of Yoga

Etymology (*Yuj*), Patanjali's & Gita's Definitions, Vedic to Modern Evolution, Demystifying 5 Myths, School Value.

Unit 2

5 Marks

Forms & Philosophical Paths

Raja Yoga (8 Limbs), Hatha Energetic Physiology, Swatmarama's Ladder, 4 Classical Paths (Karma, Jnana, Bhakti, Tantra).

Unit 3

5 Marks

Practices: Asana, Pranayama, Kriya

Surya Namaskar (12 Steps), 4 Postural Groups, Pranic Regulation, Mudras, Bandhas, 6 Shatkriyas, Japa vs. Ajapa.

Unit 4

5 Marks

Therapeutic Benefits & Anatomy

4 Modalities, Lifestyle Disorders (Anxiety, Diabetes, Obesity, BP), Maslow's Self-Actualization, Systems Physiology.

1

Introduction to Yoga and History of Yoga

Etymological Derivation, Classical Definitions, Historical Epochs, Demystifying Misconceptions & School Pedagogy

Weightage:
5 Marks

The word **Yoga** is derived from the Sanskrit verbal root 'Yuj' (युज्), which carries a threefold semantic connotation in Paninian grammar: *Yujir* Yoge (to join, bind, or unite), *Yuj Samadhau* (to integrate consciousness or attain mental absorption), and *Yuj Samyamane* (to restrain or harness). Epistemologically, Yoga signifies the experiential reunion of the individual finite soul (*Jivatma*) with the universal supreme consciousness (*Paramatma*), dissolving the illusory sense of existential separation.

CANONICAL SOURCE	ORIGINAL SANSKRIT FORMULA	EPISTEMOLOGICAL & PSYCHOLOGICAL INTERPRETATION
Maharshi Patanjali (*Yoga Sutras*, 1.2)	योगश्चित्तवृत्तिनिरोधः (<i>Yogaś citta-vṛtti-nirodhaḥ</i>)	Yoga is the intentional cessation, quieting, and mastery of the fluctuations, modifications, and reactive turbulence (*Vritti*) of the mind-stuff (*Chitta*).
Bhagavad Gita (Chapter 2, Verse 50)	योगः कर्मसु कौशलम् (<i>Yogaḥ karmasu kauśalam</i>)	Yoga is dexterity, efficiency, mindfulness, and selfless excellence in all actions and duties without egoic anxiety over outcomes.
Bhagavad Gita (Chapter 2, Verse 48)	समत्वं योग उच्यते (<i>Samatvaṁ yoga ucyate</i>)	Equanimity, balance, and serene unshakeable poise of mind in the face of success or defeat, pleasure or pain, is designated as Yoga.
Maitri Upanishad (Sixth Prapathaka)	प्राणादित्योरैक्यं योगः (<i>Prāṇādityor aikyaṁ yogaḥ</i>)	Yoga is the conscious harmonization of the inner vital breath (*Prana*) with the cosmic solar reality, unifying senses, mind, and intellect.

1.2 The Historical Chronology: From Vedic Antiquity to the Global Era

Historical
Evolution

The genesis of Yoga spans more than five millennia, evolving through five distinct historical epochs from meditative shamanism to contemporary evidence-based medicine:

1. PRE-VEDIC ERA (3000–1500 BCE)

Archaeological excavations in the Indus-Saraswati civilization uncovered soapstone seals depicting the horned deity *Pashupati* seated in classical **Mulabandhasana** or **Bhadrasana**, establishing ancient yogic postural contemplation.

Mohenjo-daro & Harappa

2. VEDIC & PRE-CLASSICAL (1500–500 BCE)

Vedic rishis practiced internal austerities (**Tapas**). The major Upanishads (**Katha**, **Shvetashvatara**, **Maitri**) and the **Bhagavad Gita** shifted sacrifice from external fire altars to the inner laboratory of the self.

Upanishads & Gita

3. CLASSICAL PERIOD (500 BCE–200 CE)

Maharshi Patanjali systematized scattered traditions into the **Yoga Sutras** (196 aphorisms across 4 Padas). Established the canonical Eight-Limbed (**Ashtanga**) system grounded in Samkhya dualism (**Purusha** vs. **Prakriti**).

Patanjali's Yoga Sutras

4. POST-CLASSICAL (500–1800 CE)

Nath yogis (Matsyendranath, Gorakhnath) rejected body-mortifying ascetism, establishing **Hatha Yoga** (**Hatha Yoga Pradipika**, **Gheranda Samhita**). The physical body (**Deha**) was refined as a divine temple to awaken Kundalini.

Hatha Treatises & Naths

5. MODERN & GLOBAL ERA (1893–PRESENT)

Swami Vivekananda introduced Raja Yoga to the West (1893 Chicago Parliament). T. Krishnamacharya, B.K.S. Iyengar, and Swami Sivananda biomedicalized postures. United Nations adopted **June 21 as International Day of Yoga!**

UN Mandate: June 21

1.5

Debunking Prevalent Myths & The Pedagogical Rationale in Schools

Applied Educational
Philosophy

D.El.Ed Buddy
Prepared by Sayeem Sadik

Dismantling Five Pervasive Misconceptions:

• Myth 1: "Yoga is a Sectarian Religious Dogma"

Reality: Yoga is an empirical, secular psycho-physiological science of well-being. It requires no religious conversion, worships no exclusive sectarian deity, and operates via autonomic neurobiology available equally to all human beings.

• Myth 2: "Yoga is Mere Physical Contortionism & Acrobatics"

Reality: Asanas constitute only one limb of an eightfold developmental ladder. Perfect headstands without emotional self-regulation, empathy, and mental stillness are empty acrobatics.

• Myth 3: "Yoga is Only for Elderly Ascetics and Hermits"

Reality: Classical treatises affirm that Yoga is designed for active householders and students to navigate social, cognitive, and occupational stress with poise.

• Myth 4: "Yoga Demands Extreme Starvation & Renunciation"

Reality: The Bhagavad Gita establishes the principle of moderation (*Yukthara*): "Yoga is not for one who overeats, nor for one who fasts excessively."

• Myth 5: "Yoga is Too Slow for Modern Fitness"

Reality: Isometric yogic contractions rebuild neuromuscular tone, optimize endocrine secretions, and promote cellular longevity far beyond superficial muscle hypertrophy.

Scope & Pedagogical Value in Elementary Schools:

Integrating structured, age-appropriate yogic routines directly neutralizes modern pediatric crises of sedentary slouching, screen addiction, and attention deficit:

• **Postural Hygiene & Spinal Alignment:** Counters spinal lordosis, kyphosis, and rounded shoulders caused by heavy backpacks and prolonged desk-sitting through corrective axial elongation (*Tadasana*, *Bhujangasana*).

• **Neurological Focus & Cognitive Working Memory:** Rhythmic diaphragmatic breath work elevates blood flow to the prefrontal cortex, enhancing attentional span, memory retention, and mathematical calculation speed.

• **Autonomic Emotional Downregulation:** Shifts children out of sympathetic fight-or-flight states into parasympathetic calm via vagal nerve stimulation, dissolving schoolyard aggression.

Developmentally Sequenced Curricular Framework:

- **Under Age 5 (Ka-Shreni):** Playful animal imitation postures (Cat, Butterfly, Cobra), sensory balancing play.
- **Ages 6 to 8 (Classes 1-2):** Structured foundational standing and sitting asanas with short silent meditative circles.
- **Ages 8+ (Classes 3 onwards):** Formal breath regulation (Anulom-Viloma, Bhastrika), Bandhas, Mudras, and Pranayama.

2.1 Raja Yoga: Maharshi Patanjali's Ashtanga Architecture (অষ্টাঙ্গ যোগ)

The Royal Path

Raja Yoga (the "Royal Path") approaches liberation through psychological self-mastery, systematic mental stillness, and meditative transcendence. Maharshi Patanjali structured this transformation across eight organic, interconnected limbs (*Ashtanga*):

1. YAMA (যম)

5 Social Restraints

Universal moral harmonies governing social interactions:

- *Ahimsa*: Absolute non-violence in deed, speech, and thought.
- *Satya*: Truthfulness and unyielding integrity.
- *Asteya*: Non-stealing (material, temporal, intellectual).
- *Brahmacharya*: Energy containment and sensory moderation.
- *Aparigraha*: Non-possessiveness and non-hoarding.

Relational Ethics

2. NIYAMA (নিয়ম)

5 Observances

Personal introspective ethical disciplines:

- *Saucha*: Internal and external cleanliness.
- *Santosha*: Radical unconditional contentment.
- *Tapas*: Disciplined perseverance through hardship.
- *Svadhyaya*: Self-study, reflection, and sacred study.
- *Ishvara Pranidhana*: Surrender to universal order.

Internal Discipline

3. ASANA (আসন)

Physical Poise

Defined canonized by Patanjali as: "*Sthira Sukham Asanam*" (steady and comfortable posture). Establishes somatic stillness so the physical body ceases to distract the meditating mind.

Psychosomatic Grounding

4. PRANAYAMA (প্রাণায়াম)

Pranic Expansion

Conscious regulation of respiration (Puraka, Kumbhaka, Rechaka). Modulates bio-energy (*Prana*), acting as the direct physiological gateway connecting somatic body to cognitive neural centers.

Respiratory Bridge

5. PRATYAHARA (প্রত্যাহার)

Sensory Gating

Withdrawing the cognitive sensory organs from external stimuli, like a tortoise retracting its limbs into its shell. Shields attention from sensory distractions.

Terminal External Limb

6. DHARANA (ধারণা)

Single-Point Focus

Binding consciousness to a single internal or external spatial point (e.g., breath at nostril tips, heart space, or sacred focal symbol). Initial concentration.

Internal Triad Limb 1

7. DHYANA (ध्यान)

Deep Meditation

An uninterrupted, seamless flow of mental awareness toward the chosen object of contemplation, like a steady stream of oil poured from vessel to vessel.

Internal Triad Limb 2

8. SAMADHI (समाधि)

Superconscious State

The ultimate state of transcendental cognitive absorption where the meditator, the process of meditating, and the object of meditation merge into pure, radiant consciousness.

The Pinnacle of Yoga

Bahiranga vs. Antaranga Yoga:

Limbs 1 to 5 (*Yama, Niyama, Asana, Pranayama, Pratyahara*) are classified as **Bahiranga Yoga** (external preparatory disciplines purifying socio-behavioral and physical systems); Limbs 6 to 8 (*Dharana, Dhyana, Samadhi*) constitute the internal cognitive triad known collectively as **Samyama (Antaranga Yoga)**, representing direct psychological transcendence.

2.2

Hatha Yoga: Physiology of Energetic Balance & The Symbiotic Ladder

Hatha-Raja
Synthesis

The etymological structure of **Hatha** reflects the fundamental thermodynamic dualism of the human energetic matrix: '**Ha**' (ह) represents the Sun (*Surya*, solar vital force, masculine metabolic drive, heating action, and the right nostril / *Pingala Nadi*), while '**Tha**' (ठ) represents the Moon (*Chandra*, lunar mental consciousness, cooling parasympathetic tone, and the left nostril / *Ida Nadi*). Hatha Yoga is the precise energetic science of balancing these opposing vital polarities to awaken and channel the central spiritual current through the **Sushumna Nadi**.

CORE PILLARS OF HATHA YOGA (SWATMARAMA'S SYSTEM):

- **Shatkriyas:** Six internal purifications balancing the Tridoshas (*Vata, Pitta, Kapha*).
- **Asanas:** Postures creating somatic steadiness (*Sthairyam*) and metabolic lightness (*Arogata*).
- **Pranayama (Kumbhaka):** Restraining breath to silence mental agitation.
- **Mudras & Bandhas:** Neuromuscular seals locking bio-energy (*Prana*) and awakening Kundalini.
- **Nadanusandhana:** Meditative absorption in subtle internal sound vibrations (*Anahata Nada*).

HATHA YOGA AS THE INDISPENSABLE LADDER TO RAJA YOGA:

Swami Swatmarama declares in the opening verses of the *Hatha Yoga Pradipika*:

"Kevalam rāja-yogāya haṭha-vidyopadiśyate"

(Hatha Yoga is taught solely as a stepping-stone ladder to attain Raja Yoga).

Attempting to quiet the restless mind (*Chitta*) directly through pure meditation without first stabilizing breath and neuromuscular tension is like trying to tame a wild stallion with a thread. Hatha Yoga refines the physical container so the mental observer can rest in effortless contemplation.

Hatha Yoga is the Somatic Foundation • Raja Yoga is the Cognitive Pinnacle!

2.3 The Four Classical Spiritual Paths & Tantra Yoga

Four Paths of Yoga

1. KARMA YOGA (কর্মযোগ)

Selfless Action

Anchored in the *Bhagavad Gita's* philosophy of *Nishkama Karma*—executing professional and personal duty with total dedication while relinquishing selfish attachment to results (*Karmaphala*). Teaches teachers to educate children out of pure love, free from ego-driven vanity.

Dedication without Expectation

2. JNANA YOGA (জ্ঞানযোগ)

Philosophical Inquiry

The intellectual path of philosophical discrimination between the Real and the Unreal (*Viveka*), dispassionate renunciation of transient attachments (*Vairagya*), and radical self-inquiry (*"Who am I?" / Neti, Neti*). Eradicates ignorance (*Avidya*) through direct discernment.

Intellectual Discernment

3. BHAKTI YOGA (ভক্তিযোগ)

Devotional Surrender

Channeling emotional sentiment into unconditional divine devotion, humility, and surrender (*Prapatti*). Exemplified in Assam's cultural history by **Mahapurush Srimanta Sankardeva** and **Sri Sri Madhabdeva** through congregational chanting (*Nam-Kirtan*).

Egalitarian Devotion in Assam

4. TANTRA YOGA (তন্ত্রযোগ)

Energetic Mastery

Utilizes geometric templates (*Yantras*), sonic seed formulas (*Mantras*), and the subtle chakra system (Muladhara to Sahasrara) to transform dense physical matter into refined spiritual consciousness, celebrating life rather than rejecting it.

Subtle Energy & Chakras

Practices: Asana, Pranayama, Mudra, Bandha & Kriya

5 Marks

Surya Namaskar Biomechanics, Postural Anatomy, Pranic Expansion, Neuro-Vascular Locks & Cleansing Shatkriyas

3.1 & 3.2

Surya Namaskar Biomechanics & Master Asana Classification Postural Science

● SURYA NAMASKAR: THE 12-STEP SYNCHRONIZED BIOMECHANICAL FLOW

Complete Cardiovascular Flow

Surya Namaskar is a rhythmic solar flow linking 12 distinct postures, alternating backward spinal extensions with forward spinal flexions, coordinated precisely with respiration and solar mantras:

1. Pranamasana

Prayer Pose • Exhale

2.

Hastauttanasana

Raised Arms • Inhale

3. Padahastasana

Hand to Foot •

Exhale

4. Ashwa

Sanchalan

Equestrian • Inhale

5. Dandasana

Stick / Plank •

Retain

6. Ashtanga

Namaskar

8 Limbs Salute •

Exhale

7. Bhujangasana

Cobra Pose • Inhale

8. Parvatasana

Mountain Pose •

Exhale

9. Ashwa

Sanchalan

Equestrian • Inhale

10. Padahastasana

Hand to Foot •

Exhale

11.

Hastauttanasana

Raised Arms • Inhale

12. Pranamasana

Prayer Pose • Exhale

FOUR MASTER POSTURAL CATEGORIES:

1. STANDING ASANAS (দণ্ডায়মান)

Builds musculoskeletal grounding, postural stability, and leg strength:

- **Tadasana:** Mountain pose; corrects flat feet, straightens spinal curvature.
- **Vrikshasana:** Tree pose; cultivates vestibular equilibrium and concentration.
- **Padahasthasana:** Forward bend; stretches hamstrings, compresses abdominal organs.
- **Ardhachakrasana:** Half-wheel backward arch; expands thoracic capacity.

2. SITTING ASANAS (উপবিষ্ট)

Stabilizes pelvic floor, aligns spine for breath work and meditation:

- **Padmasana & Sukhasana:** Meditative seats; promotes tranquil brainwave states.
- **Vajrasana:** Thunderbolt; the only asana safe directly post-meal; aids digestion.
- **Paschimottanasana:** Forward seated stretch; massages pancreas, calms nervous system.
- **Dandasana:** Staff pose; activates core stabilizers and pelvic geometry.

3. PRONE ASANAS (উপুড় হৈ শোরা)

Strengthens dorsal back extensors and massages anterior visceral organs:

- **Bhujangasana:** Cobra pose; backward spinal arch, tones adrenal glands.
- **Shalabhasana:** Locust pose; tones lower lumbar spine, gluteals, and kidneys.
- **Dhanurasana:** Bow pose; intra-abdominal pressure activates digestive liver fire.
- **Makarasana:** Crocodile pose; deep psychosomatic somatic relaxation.

4. SUPINE ASANAS (উত্তান হৈ শোরা)

Reverses gravitational pooling of venous blood and induces deep healing:

- **Sarvangasana:** Shoulder stand; bathes thyroid and pituitary in oxygenated blood.
- **Halasana:** Plow pose; extreme spinal flexibility, stimulates abdominal nerves.
- **Pawanmuktasana:** Wind-relieving posture; relieves visceral flatulence.
- **Savasana:** Corpse pose; total conscious stillness triggering parasympathetic recovery.

3.3 -

3.7

Respiratory Science, Neuro-Vascular Locks & Shatkriyas

Bio-Energetic Mechanics

Pranayama: Respiratory Expansion & Tripartite Mechanics:

Pranayama consists of three phases: *Puraka* (controlled inhalation), *Kumbhaka* (breath retention; Antar/internal or Bahir/external), and *Rechaka* (slow exhalation). Key classroom varieties:

- **Nadi Shodhana (Anulom-Viloma):** Alternate nostril breathing without breath holding. Balances left (Ida) and right (Pingala) cerebral hemispheres, reducing autonomic anxiety.

- **Kapalbhati:** "Skull-shining cleansing"; active, rapid, rhythmic diaphragmatic exhalations with passive automatic inhalations. Clears frontal sinuses, dispels lethargy, and kindles metabolic fire.

- **Bhastrika:** "Bellows breath"; forceful, deep inhalations and exhalations generating profound cellular oxygenation and metabolic heat.

- **Bhramari:** Humming bee breath; exhalation with a low-pitched humming sound, inducing immediate nitric oxide release in sinuses and lowering blood pressure.

Mudras & Bandhas: Neuro-Vascular Seals and Energy Locks:

Mudras redirect prana across neuromuscular pathways; **Bandhas** are energetic locks halting energy leakage:

- **Gyan & Chin Mudra:** Tip of thumb and index finger join, forming a closed energetic circuit. Calms cerebral agitation, enhances focus and memory.

- **Jalandhara Bandha (Throat Lock):** Chin rests firmly against the jugular sternal notch. Compresses carotid sinuses, lowering heart rate and balancing thyroid.

- **Uddiyana Bandha (Abdominal Lock):** Following full exhalation, abdomen is suctioned inward and upward against the spine. Massages visceral organs, tones sympathetic plexus.

- **Mula Bandha (Root Lock):** Contraction of the perineum/cervical base, preventing downward dissipation of apana energy. *(Maha Bandha unifies all three simultaneously).*

THE SHATKRIYAS: SIX CLASSICAL YOGIC PURIFICATIONS (ষট্‌কর্ম):

- **1. Neti:** Nasal cleanse (Jala/water or Sutra/thread).
- **2. Dhauti:** Upper digestive tract cleansing.
- **3. Nauli:** Abdominal rectus muscle churning.
- **4. Basti:** Colon irrigation and detoxification.
- **5. Kapalbhati:** Sinus and frontal brain purification.
- **6. Trataka:** Steady gaze on a candle flame to hone ocular focus.

JAPA VERSUS AJAPA CONTEMPLATION (জপ আর অজপা):

Japa: The deliberate, voluntary repetition of a sacred acoustic mantra (e.g., *Om*, Gayatri) aloud (Vaikhari), whispered (Upamshu), or mentally (Manasika).

Ajapa: Spontaneous, effortless, non-deliberate meditative breath awareness—tuning into the natural rhythm of breathing: "So" on natural inhalation and "Ham" on natural exhalation (*So-Ham* awareness), continuing unforced throughout life.

Japa Requires Conscious Effort • Ajapa is Spontaneous Effortless Awareness

Therapeutic Benefits of Yoga, Lifestyle Health & Anatomy

4

Four Practice Modalities, Combating Lifestyle Disorders, Abraham Maslow's Self-Actualization & Systems Physiology

Weightage:
5 Marks

1. SUPPLEMENTAL YOGA

Practiced as an adjunct to sports, athletics, or strenuous vocations to optimize range of motion, spatial reflexes, core balance, and prevent soft-tissue injuries.

2. COMPENSATORY YOGA

Prescribed to reverse occupational postural strains caused by sedentary desk jobs, repetitive keyboard use, or driving (e.g., carpal tunnel, forward head carriage).

3. REGENERATIVE / RESTORATIVE

Passive postures supported by bolsters, blocks, and straps. Body is held in effortless alignment for extended durations to lower cortisol and aid convalescence.

4. POWER YOGA

Dynamic, fast-paced Vinyasa flow emphasizing continuous calorie burn, core abdominal engagement, cardiovascular stamina, and sweat detoxification.

Therapeutic Yogic Management of Contemporary Lifestyle Disorders

Psychosomatic
Medicine

1. ANXIETY & DEPRESSION

Chronic amygdalar hyperarousal triggers systemic inflammation. Yoga stimulates the **vagus nerve**, elevating calming neurotransmitters (GABA, serotonin) and downregulating cortisol.

Rx: Savasana, Bhramari, Yoga Nidra

2. OBESITY & DYSLIPIDEMIA

Sedentary habits suppress metabolic rate. Dynamic asanas and pranayama stimulate sluggish thyroid activity, mobilize visceral adipose stores, and regulate appetite hormones (ghrelin/leptin).

Rx: Surya Namaskar, Kapalbhati, Paschimottana

3. ESSENTIAL HYPERTENSION

Persistent sympathetic vascular constriction raises BP. Slow exhalation and supported inversions reset aortic baroreceptor sensitivity and trigger peripheral vasodilation.

Rx: Nadi Shodhana, Sheetalī (Avoid headstands!)

4. TYPE-II DIABETES MELLITUS

Insulin resistance impairs cellular glucose uptake. Torsional spinal twists and abdominal compression asanas directly massage the pancreas, stimulating beta-cell insulin secretion.

Rx: Ardha Matsyendrasana, Mandukasana

YOGA AND ABRAHAM MASLOW'S SELF-ACTUALIZATION:

Psychologist Abraham Maslow identified **Self-Actualization** as the apex of human psychological development—realizing one's innate potential. Yoga offers an empirical, somatic pathway to attain this state:

- **Transcending the Ego (*Ahamkara*)**: Dissolves insecurity and defensiveness, fostering unconditional empathy.
- **Internal Congruence**: Unifies thought, speech, and physical action into authentic ethical living.
- **Peak Experiences (*Samadhi*)**: Unlocks states of intuitive clarity, boundless creative insight, and unshakeable inner peace.

Yoga Transforms the Educator from an Insecure Worker into an Inspiring Presence!

DIRECT IMPACT ACROSS HUMAN PHYSIOLOGICAL SYSTEMS:

- **Circulatory System**: Inversions promote venous return to the heart, lower resting pulse rate, and enhance peripheral vascular elasticity.
- **Musculoskeletal System**: Restores spinal lordotic and kyphotic curves, lubricates synovial joint capsules, and prevents osteoporosis.
- **Respiratory System**: Enhances forced vital capacity (FVC), recruits dormant pulmonary alveoli, and strengthens the thoracic diaphragm.
- **Nervous System**: Modulates sympathetic-parasympathetic balance, reduces amygdalar reactivity, and stimulates alpha/theta brainwave coherence.
- **Digestive & Endocrine Systems**: Enhances peristalsis, clears visceral congestion, and regulates hypothalamic-pituitary-thyroid/adrenal axes.

PAPER S1.8 CONTINUOUS INTERNAL ASSESSMENT BLUEPRINT

Total: 30 Internal Marks • Practical Drills, Asana Performance, Field Study & SIP Linkage

Session 2026

Classroom
Assignments

5 Marks

Yogic Theory Portfolios

Practicum & Viva

5 Marks

Demonstration &
Alignment

Institutional Unit Test

10 Marks

Written Evaluation

SIP-I School Activity

10 Marks

School Drills & Case
Studies

PRESCRIBED PRACTICUM ACTIVITY REQUIREMENTS:

- **Field Investigation & Monograph (5 Marks):** Visit a recognized yoga ashram, clinical wellness center, or traditional institution; interview an active practitioner on verified therapeutic benefits; or prepare a documented monograph on the district celebration of the **International Day of Yoga (June 21)**.
- **Peer Demonstration:** Flawlessly execute at least 5 prescribed asanas before the evaluator, articulating safety precautions, alignment vectors, and contraindications.
- **Daily Morning Assembly Protocol:** Lead and practice Pranayama (Anulom-Viloma, Kapalbhati, Bhramari) and silent mindfulness meditation for at least 10 minutes during institutional training.

SCHOOL INTERNSHIP (SIP-I LINKAGE - 10 MARKS):

During the 2-week School Internship-I, student-teachers must conduct daily morning yoga and asana sessions for elementary children (Sukhasana, Vajrasana, Bhujangasana, Tadasana, Vrikshasana) and compile documented field data of at least one local individual who recovered from chronic conditions (trauma, depression, paralysis, hypertension) through yoga therapy, submitting an analytical report countersigned by the school head teacher.
